

WOODEN WINDOW (TIMBER WINDOW)

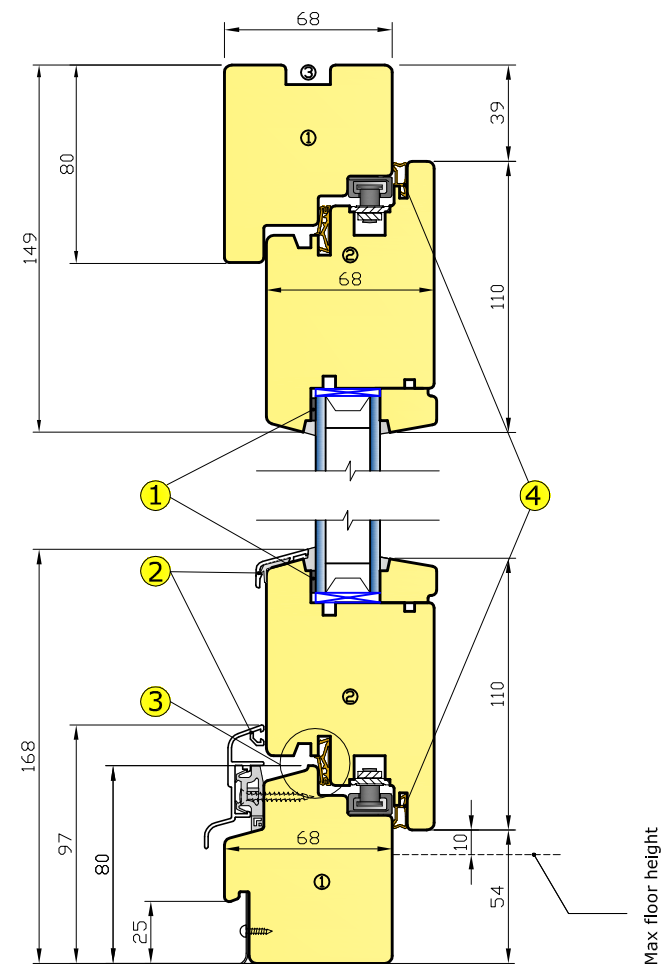

- ① Compensation gasket - proper technical solution for avoiding glass cracking and improving thermal and noise resistance
- ② Aluminium drip moulding with a click-system
- ③ Innovative window profile for guaranteeing the best thermal and noise insulation
- ④ Extra gasket - possibility for improving thermal and noise insulation

- ① window jamb
- ② window frame
- ③ grooves for installation foam (at the sides and upper edge of the window jamb)

WOODEN BALCONY DOOR (TIMBER BALCONY DOOR) (with standard wooden threshold)

- ① Compensation gasket - proper technical solution for avoiding glass cracking and improving thermal and noise resistance
- ② Aluminium drip moulding with a click-system
- ③ Innovative window profile for guaranteeing the best thermal and noise insulation
- ④ Extra gasket - possibility for improving thermal and noise insulation

- ① door jamb
- ② door frame
- ③ grooves for installation foam (at the sides and upper edge of the door jamb)
